ABSTRACT

This report presents the results of the 21st annual study of application and enrollment patterns of transfer students within the State University of New York (SUNY). The report includes data on transfer students moving from two-year colleges to other two-year colleges, from senior institutions to two-year colleges, and from two-year colleges to senior institutions. Following a brief introduction, detailed data tables are presented in the following sections: (1) institutional summary tables, which provide data on headcount enrollments and educational background of transfer students, both systemwide and by individual institution; (2) coordinating area summary tables; (3) distribution of transfer students by location and type of prior institution; (4) students that have transferred from other SUNY institutions; (5) students that have transferred from other New York institutions; (6) transfer students from outside New York State; (7) transfer trends pertaining to enrollment, associate degree, and institution types; (8) undergraduate admissions tables; and (9) associate degrees granted by SUNY two-year colleges. Report highlights indicate that a total of 33,071 transfer students enrolled in SUNY in fall 1990, representing a 7% increase from the previous fall; and that 41% of SUNY transfer students are enrolled at two-year institutions. Appendixes provide a map of state university institutions, a chronology of dates of establishment of SUNY institutions, and a list of SUNY publications. (WJT)

PREFACE

This is the 21st annual study of the application and enrollment patterns of University transfer students developed by the Central Staff Office of Institutional Research. The study was conducted in response to the many requests for information regarding the inter-campus mobility of students attending institutions under the program of the State University of New York.

Because of the importance of reliable information regarding transfer students for regional and system-wide planning and inter-institutional cooperation, the data gathered for this study have been organized and presented in a variety of formats designed to provide immediate answers to a wide range of questions which may be formulated regarding transfer students. The basic data are presented so as to directly relate the transfer student's prior institution and current SUNY institution and entry level. This information is provided for individual institutions, institution types, and institutions by coordinating area. Additional information is provided regarding trends in transfer students, relationship of the associate degree to transfers, admissions success of transfer students and other related information.

The acquisition of the data contained in this study involved a great deal of work on the part of the individual institutions. We appreciate the cooperation and effort required to provide these data. We would particularly like to thank our professional, statistical and typing staffs whose efforts made this report possible.

INTRODUCTION

Transfer students defined

Because of the conventional use of the term 'transfer students' and because different sources of transfer data may exist, the definition of transfer students used for this study is of special importance. Transfer students are herein defined as those undergraduate students who were enrolled at a State University institution for the first time in a given Fall term, but who had attended other colleges or universities prior to the given Fall term. With this definition, we have transfer students moving from two-year to other two-year colleges, from senior to other senior institutions, from senior institutions to two-year colleges, as well as from two-year to senior institutions. Even if no credits were transferable, albeit an uncommon case, the student moving from one institution to another would be a transfer student.

Students who simply change majors at the same institution are not considered transfer students in this study. Graduate students are not included in this study. The New York State College of Veterinary Medicine and the State College of Optometry which offer only graduate programs, are not included in this report.

The number of transfer students reported here is an understatement because of the difficulty some institutions have in obtaining background information on those students who are not admitted to specific degree programs by application. For example, in Fall 1990 there are 6,109 transfer students (18.5 percent) whose previous institution is unknown. There are undoubtedly many others who are not even known to be transfer students, but these are not likely to be seeking admittance to a program.

Design of the study

Transfer student studies can be designed to follow identified students longitudinally, observing their success patterns. The investment of effort and time required for such studies would be substantial, given the size and complexity of the State University of New York. For this reason, a different approach was used in this study.

The paradigm used here was the analysis of the higher education backgrounds of transfer students enrolled in the various levels of the institutions under the program of the State University of New York. Some types of conclusions cannot flow from such a study; e.g., students who were unsuccessful in obtaining transfer acceptances anywhere in these institutions are not included even though they were formerly enrolled at one of the institutions included and may have graduated in University-parallel programs. Therefore, this study is based on an input model, not a true follow-up model.

Differences between this study and data from the Admissions Processing Center

The data from the Central Staff Admissions Processing Center (A.P.C.) does not correspond with the data of this study. The major difference is in the populations surveyed. Several institutions under the program of the State University of New York do not participate with the A.P.C. and consequently the data collected by A.P.C. is not system-wide. This report, however, includes system-wide data for all undergraduate institutions under the program of the State University of New York. The census date for the collection of data also differs. The data included in this study shows enrolled students at a specific time after classes have started and enrollments have stabilized.

Regional statistics

The articulation of transfer students is an important consideration in regional planning and cooperation among the institutions of the State University. This report includes an index of State University institutions by coordinating area. In addition, data on the educational background and placement of transfer students, undergraduate admissions and enrollment data are provided by coordinating area.

SUMMARY OF DATA

General Findings

A total of 33,071 transfer students enrolled in the State University of New York in the Fall of 1990. This represents a 7 percent increase from the previous fall, but the distribution between two year and four year institutions has remained basically unchanged. Last year, there was a dramatic increase in the proportion of transfer students enrolling in the two year colleges, particularly the community colleges. This switch in enrollment patterns has persisted into 1990 and again we see 41 percent of SUNY transfer student enrolling at a two year college.

The following table shows the distribution of transfer students between the senior and two-year institutions:

Fall term	Total transfer students reported	Percent enrolled Senior Institutions	Percent enrolled at Two-year Colleges
1990	33,071	59.0	41.0
1989	30,937	59.1	40.9
1988	29,151	66.3	33.7
1987	28,235	66.9	33.1
1986	28,166	64.0	36.0
1985	28,030	63.3	36.7
1984	28,583	62.3	37.7

1978	27,075	62.0	38.0
1977	26,702	61.0	39.0

The following represents the distribution of transfer students by source. When compared to Fall 1989, the most significant change is a 2.7% drop in the percentage of transfers from a SUNY two-year college enrolling in a SUNY senior institution.

Concluding Remarks

A study of this complexity will undoubtedly raise further questions and lead to more insight about the extent and nature of student mobility to and within the State University of New York. It is hoped that the basic information will be useful and that on the basis of these and other data, more students can find ways to further their search for appropriate and rewarding educational experiences.
